Exercises

Exercise 1:

In your first exercise for today, you should download and install WordPress CMS. After installation, you should try different themes for your website (also try to install themes from the zip file). The last step for the first exercise will be to find some plugins for your WordPress website and to install them.

Exercise 2:

You all know fake news websites. Now you will create a WordPress website for fake news. You should find a proper theme, insert articles and try to create a real website. At the end of the day, you will present your solution.
